PROFILE

A software engineering graduate with attention to detail is looking for a challenging career as a Full Stack or Software Engineer. I want to use my organizational, problem solving and collaborative skills in new projects. They are dedicated to continuous learning and staying up to date with the latest technology.

PROJECTS

WRITE-NOW

- A real-time collaborative document editing platform built with React for the user interface, MongoDB for document storage, Socket.io for real-time synchronization, and Quill for the rich text editor. Offers features like document creation, editing, and sharing with multiple users.

NEWS-WEBSITE

- Created a responsive news website using React, Vite, and Bootstrap, featuring real-time updates, search functionality & category filtering.

ACHIEVMENT

- Published a research paper on IEEE Title- Internet of Things (IoT) based Interconnected Systems for Effective Disaster Management.
- Participated in university Hackathon.

CERTIFICATE

Oracle Academy:

- Database Foundations | Database Programming with SQL
- Java Foundations | Java Fundamentals | Java Programming
